Chattanooga-Hamilton County/North Georgia TPO  
Annual Obligated List of Projects Fiscal Year 2015

Introduction

The Metropolitan Planning Organization (MPO) was created in 1977 in compliance with the Federal Aid Highway Act of 1973 and the Urban Mass Transportation Act of 1964. Since 1977, the Chattanooga-Hamilton County/North Georgia Transportation Planning Organization (formerly Metropolitan Planning Organization) has been the federally-designated MPO for the Chattanooga, TN-GA Urbanized Area. The CHCNGA TPO planning area currently includes Hamilton County, Tennessee and Catoosa County, GA and the northern portions of Dade and Walker Counties in Georgia. The TPO coordinates continuing, cooperative, and comprehensive (3-C planning process) transportation activities within CHCNGA area along with the Tennessee and Georgia Departments of Transportation and the Chattanooga Area Regional Transportation Authority (CARTA).

The TPO, staffed and managed by the Chattanooga-Hamilton County Regional Planning Agency (RPA), is comprised of a policy board known as the Executive Board, a technical committee known as the Technical Coordinating Committee (TCC) and professional staff. The RPA staff performs the day-to-day functions of transportation planning activities for the designated MPO planning area.

The Annual Obligated List of Projects

Planning requirements for MPOs are outlined in the federal transportation legislation known as the Fixing America's Surface Transportation (FAST) Act, formerly MAP-21. As in past transportation bills, FAST requires the MPOs to publish an annual listing of projects for which funds have been obligated in the preceding year as a record of project delivery and a progress report for public information and disclosure. In addressing FAST requirements, this report lists all transportation projects in the Chattanooga-Hamilton County/North Georgia TPO's region that were obligated during fiscal year 2015.

The term "obligation" is defined as the Federal government's legal commitment to pay or reimburse the States or other entities for the Federal share of a project's eligible costs. An obligated project is one that has been authorized by the federal government and funds have been approved for reimbursement. For FHWA projects, an obligation takes place when a project agreement is executed and the State/grantee requests that the funds be obligated. Allocated funds are an administrative distribution of funds set aside by the Federal Government for the TPO area that do not have statutory distribution formulas.

The MPO is responsible for preparing the list and it is the MPO's Transportation Improvement Program (TIP) that serves as the basis for the information. As a condition to receiving federal project funds, the TIP must list all highway and public transit transportation projects proposed for funding under Title 23 (highways) and Title 49 (transit) of the US Code. It also must contain state and locally funded regionally significant transportation projects regardless of funding source. The TIP covers a four-year period and is based on funds which are reasonably expected to be available for project implementation. The TIP also serves as a document to provide a reasonable opportunity for all citizens and interested parties to review and comment concerning the development of the TIP and the intent to fund specific projects. The CHCNGA-TPO is responsible for the development of both the Tennessee and Georgia portions of the TIP which are then incorporated into the State Transportation Improvement Program(s) (STIP). The TIP is developed by the TPO through a comprehensive, continuing and cooperative effort with the Federal Highway Administration, Federal Transit Administration, Tennessee Department of Transportation (TDOT), Georgia Department of Transportation (GDOT), the Northwest Georgia Regional Commission (NWGRC), local transit operators, the public and other interested parties. A new TIP is developed at least every four years and updates are made to the TIP/STIP annually and as necessary through Amendments and Adjustments/Modifications.

The content of the Annual Obligated List of Projects is consistent with the project listing in the TPO's TIP, including the project name, project number, location, and project description. The Annual Obligated List of Projects Report is prepared at the end of each federal fiscal year to show what actually happened with TIP federal project funding during the fiscal year.

Provisions in the previous federal transportation bill, allowed the combination of non-regionally significant and environmentally neutral projects into groupings by funding source. These groupings are shown at the end of list and color coded by grouping type. The groupings listed in this report are the Intersection Improvements Grouping for Hamilton County, the Intersection Improvements Grouping from the 2011-2014 TIP, the Resurfacing and Intersection Improvements Grouping for Soddy-Daisy, the Resurfacing Grouping for Red Bank from the 2014-2017 TIP, the Signal Mountain Resurfacing Grouping, the Resurfacing Grouping from the 2011-2014 TIP and the Resurfacing Grouping for East Ridge from the 2014-2017 TIP.

In addition to the local groupings discussed above, this report includes TDOT, GDOT, and CARTA projects totaling approximately \$133.3 million in federal funds which were obligated for the TPO area during fiscal year 2014 (October 1, 2014 – September 30, 2015). This report includes a total of \$133,306,634 of Federal Funds obligated for the Tennessee portion of the TPO, \$5,417,524 obligated for CARTA, and \$10,872,473 obligated for the Georgia portion of the TPO.

\* Entire project, or a portion of the project, is in the MPO planning area but outside the urbanized area boundary
